

ILR-1000-2 LASER RANGEFINDER

AC82

Infrared Laser Rangefinding Module for HYBRID Series

The InfiRay Outdoor ILR-1000-2 Infrared Laser Rangefinding Module enhances precision shooting with thermal optics, seamlessly integrating with HYBRID Series thermal weapon sights via USB-C. Additionally, the ILR-1000-2 integrates with the HYBRID's onboard ballistic solver by providing real-time range data to display a firing solution on a custom drop-compensating reticle. This eliminates the need for guesswork in range estimation, regardless of the time of day. With a range accuracy of +/- 1 yard out to 1,000 yards*, the ILR-1000-2 displays precise results directly on the connected HYBRID Series weapon sight.

Featuring a compact and lightweight machined aluminum housing, the module is securely mounted with a quick-detach mechanism that ensures repeatability and easy operation, even with gloves. This integrated system allows users to observe, range, and adjust for bullet drop seamlessly, regardless of lighting condition.

CAUTION
THIS PRODUCT IS A CLASS 3R LASER PRODUCT

Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

*Range performance depends on the target being measured and environmental conditions.

AC82 PRODUCT SPECIFICATIONS

ITEM NUMBER: IRAY-AC82

MAP: \$799

UPC: 850048751125

WEIGHT: 5.5 oz

MATERIAL: 7000 Series Aluminum & ABS

DETECTION RANGE: 1,000 Yards

MOUNTING INTERFACE: Picatinny

COMPATIBILITY: HYBRID Series
