HYBRID SERIES

MULTIFUNCTION THERMAL OPTIC

First introduced as the powerful combination of a thermal weapon sight and a thermal clip-on unit, the HYBRID line-up continues to evolve with specialized models, top-performing sensors, and an advanced feature set designed for technical shooters. The combination of the HYBRID's low-distortion orthoscopic eyepiece and a 1.03-inch large-format 2560×1920 display provides comfortable viewing, a sharp image, and massive eye relief. The HYBRID also unlocks advanced features such as compatibility with a 1,000 yard laser rangefinder, a custom ballistic reticle generator, wireless remote, and an onboard ballistic solver. This year, the HYBRID family expands with the addition of the 75 mm model (HYH75W), optimized for long-range shooters and the 50 mm 90 Hz model (HYL50W), optimized for smooth motion and fast moving targets.

IBP-1H Battery PackField-swappable lithium battery offers 6+ hours of run time (varies by model and settings).

2560×1920 AMOLED Display

Large-format display and magnified eyepiece create unmatched eye relief.

mode for increased battery life.

Advanced Recoil-mitigating Picatinny STD-1913 Mount

Isolates recoil for improved accuracy and long-term durability.

All models in the HYBRID series can be used as a clip-on thermal in front of a day scope (with magnification up to 10x). Additionally, all HYBRID models are compatible with the ILR-1000-2 Laser Rangefinder, which provides real-time ranging data on the display and can even dial a firing solution o based on user-supplied drop values.
