

SLIM COMPACT MULTI-FUNCTION THERMAL OPTIC

The SLIM series from Nocpixon provides the best balance of value and features in a compact optic. Focused on versatility and ease of use, SLIM models can be used as either a handheld monocular or a weapon sight. With the included proprietary quick-detach mounting system a hunter can quickly scan and then re-attach the optic to the rifle while maintaining zero. A magnesium alloy body and quiet, soft-touch buttons provide excellent ergonomics in both handheld and weapon-mounted configurations. The included IRB-2 batteries (flat-top 18650 style cell) are easy to swap—letting you stay out longer with the ability to charge through the optic using a magnetic cable. Generous eye relief and a 1024x768 AMOLED display provide a comfortable and highly detailed viewing and hunting experience.

SLIM L35 pictured with included QD mount.

The SLIM series utilizes a dual-QD mounting base, allowing hunters to quickly remove the optic to use as a handheld scanner. The mounting interface uses an internal magnet to quickly and easily index the mounting shoe (that remains on the rifle) for a reliable return-to-zero.

WHAT'S NEW?

Based on the L35, we've added the new L25 model, providing an affordable option with a wide field of view and lower base magnification.

- Ambidextrous one-handed design for easy use as a handheld monocular or weapon sight.
- Recoil-activated video automatically records footage before and after a shot.
- High-contrast 1024x768 AMOLED display provides increased clarity and detail.
- Quick-release dual-throw mount with a magnetic alignment aid provide fast and secure return-to-zero (1-MOA) weapon mounting.
- Uses common 18650 style rechargeable batteries.
- Available in high and standard-resolution models.
